**As the current COVID-19 situation is still active in many parts of the world we have decided to turn the WDBE2020 main event into a fully virtual experience.**

We have already digitized our global pre-events and the big bang comes this September. Locations of the main event, Helsinki + Tallinn +

in between, remain, but are now globally more accessible, safe and easy to be sustainably enjoyed. The event will be moved to a virtual platform created by Zoan – the virtual locations will stay the same introducing these two northern capitals to a global audience, with a twist from the future.
